	<p>Complete the following for each knowledge check:</p> <ol style="list-style-type: none"> 1. Why do you think your actual score varies from how you think you performed? 2. Highlight any areas you think need improvement 3. State your action plan to address you perceived knowledge weakness. <p>NOTE: You can extend this form to multiple pages.</p>
Knowledge check one	<p>My actual score varies from my predicted score is pretty much less than what I expected. I feel that I rushed this quiz and never did enough whilst I was completing this. Having rushing this, it enabled me to deserve what I currently have. I feel that this is not what I expected and I am disappointed with 55%. The score I want is always above 60%.</p> <p>Looking back, I felt that the areas that I needed to improve is reading the questions properly and not consider panicking over the time limit. I lost important marks on the questions that I feel I could have gained more marks if I had to complete this again. Therefore, to improve this, I will need to go over my lecture notes and tutorial notes to get an improved grade. My plan is to go to each tutorial lesson and do as well as I can in these quizzes. These are the areas that I feel that I need to improve and these weaknesses will be worked on to improve my grade to be.</p> <p>The improvements that I need is reading the questions properly is something I lacked whilst I was completing this quiz. The action plan to address my weakness is reading the questions properly would enable me to not make silly mistakes. The second improvement is reading what the quiz is going to be about. This would increase my understanding of the topic before I actually start the quiz in the first place. For all three quizzes, I completed it without any knowledge of which ones I should open and revise for.</p>
Knowledge check two	<p>My actual score for this was 59%. Considering this was a slight improvement from Quiz 1, I still felt that I did not do enough to improve me grade to my minimum expectation. I feel that my actual score varies from 60 because I did not learn my lesson from my previous quiz. I misread the questions again and rushed it during the one hour.</p> <p>The improvement areas that I need to focus on is following my instincts. I feel that during the one hour, I feel pressured to click an answer without even thinking about it. In addition, once the one hour is complete, I think back and feel that I did not do well on this. If I had one more mark, I would have got the minimum expectation that I wanted. In addition, I had an error whilst I was completing my quiz, which I felt put all my focus on the error that I did not look at my other answers.</p> <p>The first weakness that I would like to improve is always to reading the questions properly. I feel that missing lectures too was a big blow to the current grade I have. To improve my grade, by going to the lectures that is needed is the most important. This would improve my knowledge of the whole topic.</p>
Knowledge check three	<p>For this quiz, I felt very disappointed because I felt I did it all well. I did all of the above. I went over the topics before the actual quiz. I read about it and felt confident I will do well. As stated before, 60 out of 100 is the minimum</p>

	<p>expectation that I feel that I need. Having not be able to get this on Quiz 3 has made me disappointed.</p> <p>To improve my grade, by going to the lectures that is needed is the most important. This would improve my knowledge of the whole topic. By again, revising over the lecture notes and going to tutorials would improve my grade too.</p> <p>The action plan to address my weakness is I feel that searching up answers and going through any research of the question before the test. I feel that this can make me feel much more confident of the answer that I put down. When I was completing this, I felt that I did not do enough research to be confident on the answer that I got. I got very confused whilst I was completing the quiz. This enabled confusion and low mark.</p>
