

In the tutorial, you will be able to choose one of the article titles for your coursework. For your homework, you are required to start identifying sources that may be suitable for your assignment bibliography. One would expect about 10 to 20 sources to be identified by next week.

Following the University of Greenwich Harvard style compile a bibliography and upload it as a PDF into the COMP1715 weekly upload system at least 24 hours before your next COMP1715 tutorial.

Please note that you can get some marks against coursework 1 for completing this exercise.
